SUMMARY

Two years in product ops at MathonGo, an EdTech platform built around data-driven decision-making. I built the pipelines behind its most detailed exam analysis, scaled our test-series lineup from 1 exam (JEE Main) to **14**, and drove the feature work that grew Marks App from nothing into a real product with clear DAU targets. Along the way: managed teams of **30+**, hired and onboarded **100+** people, and led a **40-person team** as President of my college's Alumni Relations Cell.

EXPERIENCE

MathonGo

Dec 2023 – Jan 2026

Operations Manager Intern

Bengaluru, India

- Built the data pipelines behind MathonGo's exam analysis, covering **500K+ students** across every exam we supported.
- Managed a **30+ member team** across three subsidiaries, split into sub-manager tiers, and ran hiring for **100+ interns** over two years – writing the SOPs that got new people up to speed fast.
- Stress-tested the College Predictor against edge cases (boundary ranks, category-specific seats) with Product and Engineering before every release, achieving **99.4% data accuracy** ahead of rollout to **500K+ users**.
- Scaled the test-series lineup from **1 exam (JEE Main) to 14**, owning the question-bank architecture and analysis pipeline for each launch.
- Marks App didn't exist when I joined – we built it up step by step, and I owned the new features and initiatives that shaped it, aimed squarely at growing **daily active users**.

KEY PROJECTS

College Predictor Tool – MathonGo

[View Tool](#) 

- Built the College Predictor for JoSAA, JAC, and BITSAT, integrated with the score calculator so students could go from score to predicted outcome in one place, driving roughly **10 lakh hits** within 3 months of launch.
- Owned the product side of it end to end – sourcing the data, validating whether it was usable, and deciding what belonged in the model.

Digital Books – MathonGo

- Replaced generic exam books with personalized, exam-specific question banks (including state-level exams), addressing wasted spend on irrelevant content.
- Added new exams to the lineup every year to keep scaling it, contributing to the product's growth toward **2 lakh paying students**.

LEADERSHIP & CAMPUS IMPACT

Alumni Relations Cell (ARC), TIET

Sept 2025 – Jan 2026

President

- Led a **40-person executive team** running alumni engagement, outreach, and day-to-day operations for the cell.
- Hosted Engineers Beyond Engineering and Insider Bench, two podcasts that reached **1500+ listeners** per episode.

Lead Society, TIET

Oct 2024 – Apr 2025

Joint Secretary

- Directed cross-functional student squads to execute campus initiatives end to end – planning, budgeting, and coordinating across departments to get things delivered.

SKILLS & METHODOLOGIES

Cross-Functional Execution: Product Thinking, Ops Design, GTM Support, Feature Validation, User Research, PRD Writing, User Acceptance Testing (UAT), Workflow Design, Requirement Analysis

Data & Analytics: SQL, Power BI, Advanced Excel, Google Sheets, Dashboarding, Data Validation, Root Cause Analysis

AI & Automation: AI-assisted Data Analysis & Documentation

Collaboration: Cross-functional Team Leadership, Process Optimization, Structured Documentation, Standard Operating Procedures (SOPs)

EDUCATION

Thapar Institute of Engineering and Technology

Expected 2027

B.Tech – Electronics and Computer Engineering

Sant Gyaneshwar Model School, Delhi

2022

Senior Secondary Education (CBSE)
